-----------------------------------------------	---

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.36.0. The release software package is comprised of the following:

- VS GUI application 1.7.36.0
- VistA M patch SD*5.3*833

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see [Features and Functionality](#) for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.36.0 and VistA patch SD*5.3*833.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.36.0 package and VistA patch SD*5.3*833.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.36.0 and VistA patch SD*5.3*833. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-4501	RTC's are showing in the RM Grid inaccurately numbered. The number order starts with 2 instead of 1 and ends with 1 more number than the number of RTC's requested.
VSE-4583	UI: GUI Crashes When Searching a Patient and Gender is Empty
VSE-4671	VistA: Create Check for Contact Type to Avoid Syntax Error
VSE-4700	VistA: Correct issue with SDES EDIT CLINIC AVAILABILITY
VSE-2404	VistA: Create SDES RPC to Search Patient
VSE-4156	VistA: Retire RPCs post release of SD*5.3*823
VSE-4525	VistA: Modify SDES VVS RPCs to return JSON output
VSE-4556	VistA: Modify SDES GET CLINIC INFO2 and SDES GET CLINICS BY CLIN LIST to include #4 INSTITUTION field 802

Work Item ID	Summary of Change
VSE-4592	VistA: Modify SDES GET CLINIC INFO2 to include IEN and stop code
VSE-4598	VistA: SDES CREATE APPT REQ errors when setting priority to FUTURE
VSE-4605	VistA: Return MRTC sequence number to GUI
VSE-4622	VistA: RPC to return "VETERAN" type APPT requests

4. User Documentation

The documentation distributed with VS GUI Release 1.7.36.0 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
